

Safety, health, environmental, risk & quality management software that **moulds** to your needs...

Everything. In one place.

What is IsoMetrix?

IsoMetrix is the latest generation agile web based integrated Safety, Health, Environmental, Risk and Quality (SHERQ) management system software application from Metrix Software Solutions (Pty) Ltd.

IsoMetrix assists businesses to gather, manage and share relevant SHERQ information and report on performance in line with specific requirements.

The software effectively integrates the different health, safety, environmental and quality processes in a dynamic, flexible and systematic way, thus creating an effective integrated management system solution.

IsoMetrix helps organisations drive compliance with international management system standards and guidelines such as ISO 9001, ISO 14001, OHSAS 18001, ISO 22000, ISO 31000 and many more.

Plan, do, check, act & review simplified

Typical processes managed within IsoMetrix:

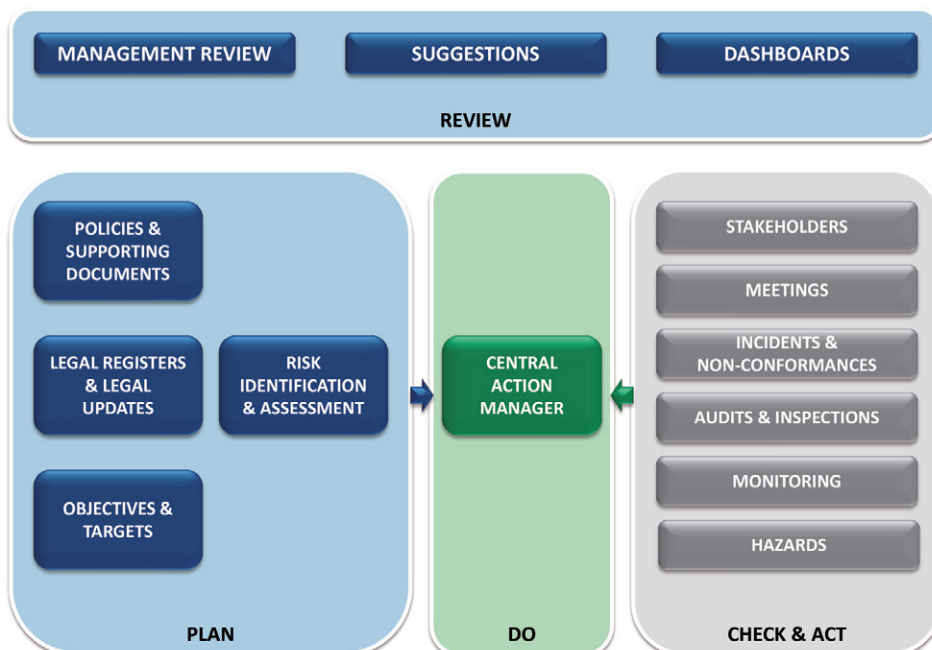

- Integrated risk management (hazards and risks, aspects and impacts)
- Non-conformance and incident management
- Behaviour based safety management
- Audit management
- Inspection management
- Sustainability reporting (including GRI type reporting)
- Occupational health and hygiene management
- Training records management
- Legal requirements management
- Permit management
- Action management
- Meeting management including management review
- Powerful management dashboards and reports
- Enterprise-wide risk management

And many more ... through the flexibility offered by the IsoMetrix eModules self-service platform the range of functionality and applications is almost endless.

IsoMetrix lets IT serve business like never before

IsoMetrix delivers business value immediately because few new skills are needed to produce custom IsoMetrix functionality.

- IT managers and business analysts can rapidly create cutting edge functionality that focuses on the SHERQ processes that matter most to business users.
- They can quickly extend and enhance those applications as business needs change.
- The IsoMetrix E-Modules™ platform also means the financial and time costs of on-going requests for new functionality from business users are dramatically lowered without compromising data security, quality and governance.

What can I get out of it?

IsoMetrix dashboards - Analytics powered by QlikView

IsoMetrix dashboards are powered by QlikView. QlikView is a new kind of Business Intelligence software that changes your world. It is BI software that lets you stop guessing and start knowing how to make faster, smarter decisions.

- Uncover hidden trends and make discoveries that drive innovative decisions.
- Ask questions and pursue insights on your own or collaboratively.
- Search across all your data to get the big picture—get results that let you see new connections and relationships across your data.

Latest technology

IsoMetrix can either be deployed on a local server, a Metrix hosted server or in the Cloud.

The following technologies are used:

- The web application is coded in ASP.NET and built on the .NET Framework.
- The application database is built on SQL Server.
- SQL Server Reporting Services are used for reporting.
- Analytics - Charting, dashboards, KPIs and scorecards are powered by QlikView.

The database schema is built as the administrator creates the system using the IsoMetrix eModules self-service platform.

- Tables, stored procedures, triggers, views, indexes and foreign-keys are created for each module of the system as each module is created by the software administrator.
- The data is stored in a normalised relational model, not a matrix or data dump.
- IsoMetrix is built with attention to creating minimal load on network and servers.

Need help with Implementation?

Training

Custom training material based on your configured solution is created to train all users. Train the trainer approach can also be followed.

Helpdesk facility and user support

Metrix has a dedicated support helpdesk. This is staffed by professional consultants dedicated to customer support. Metrix prides itself on the highest level of support.

IsoMetrix SHERQ templates

Start with predefined IsoMetrix templates which can be deployed as is or tweak them to better suit the need.

IsoMetrix custom solutions

For expert enhancements or specialized applications you don't have time to create yourself, speak to an IsoMetrix Business Consultant, who can design and build a custom web-based application for you—within your budget and timeframe.
